**What is Kayaking?** Simply put, **Kayaking** is the use of a kayak on a body of water. There is an abundance of waters to choose from for every type of venture. Depending on the type of watercraft you have you will be able to be Exploring, Fishing, River Tripping, [Wildlife](#) Viewing, Experiencing Nature and the outdoors also even playing games like tag on waters all over Wisconsin. Typically kayaks DO NOT HAVE AN ENGINE because the passengers paddling is the power source and is great exercise for your upper body and cardiovascular system. The Kayak operator uses a double paddle with blades on both ends. The **Kayaks** performance is dictated by the operators ability and the design of the *kayak* inclusive of the hull shape, style, size, shape, sides and bottom. If you're an early bird person, get out on the water and enjoy sunrises on your favorite creek, river, lake or pond on a cool morning. Or take time to appreciate a spectacular Wisconsin sunset as you're recording the catch of a Largemouth Bass with your kayaking video camera setup. You might get to see some Wildlife that you would not get to see from shore by using a load motor boat. You can never predict what you will see. You may see waterfowl of all kinds including Ducks, Canadian Geese, Swans and other birds that love the water like Cranes, Bald Eagles, Osprey, Egrets and Herons.
